**REQUEST FOR RECONSIDERATION
AFTER FINAL REJECTION**Commissioner for Patents
Washington, D.C. 20231
Box AF

Dear Sir:

This is in response to the Advisory Action mailed September 19, 2002, which maintained the final rejections of all pending claims, 1-22. In light of the remarks that follow, reconsideration and withdrawal of the final rejections is respectfully requested.

Remarks

The present invention is directed to a method for making a fuser member in which a coating composition contained in an organic solvent is coated on the support, thereby forming a layer of the coating composition on the support. The coating composition comprises a fluorocarbon thermoplastic random copolymer, a curing agent having a bisphenol residue, a particulate filler containing zinc oxide, antimony-doped tin oxide particles, and an aminosiloxane; the fluorocarbon thermoplastic random copolymer has subunits of $-(CH_2CF_2)_x-$, $-(CF_2CF(CF_3))_y-$, and $-(CF_2CF_2)_z-$, wherein x is from 1 to 50 or 60 to 80 mole percent, y is from 10 to 90 mole percent, z is from 10 to 90 mole percent, and $x + y + z$ equals 100 mole percent. The layer of the coating composition on the support is cured for 5 to 10 hours at a temperature in the range of 25°C to 120°C.
